## BACK TO THE GARDEN

Many things have been planted
In our precious garden
With our without our consent –
There are too many weeds!
We need to plant fresh seeds
To grow and blossom, and show
That we mean to succeed
In changing the underlying picture –

The substrata of human thought Through all our languages –
Words, information, movement, music, art.
We can grow new crops we can thrive on –
Organic produce of our own creation,
Fruits of our common understanding,
Which will flourish, dance, shine, sing, flow,
And be shared through community effort

All of you can come join in the garden –
Bring your positive wishes,
Your ideas, your loving hearts –
Together we will tend the flower beds
Of human imagination and consciousness –
Spread nourishment into the soil
From which our new world will spring
In luxuriant, succulent, tasty colour.

Please come and join in with the open group page "Back to The Garden" on Facebook, or the website www.backtothegarden.org.uk

Blessings, Joules
